

Descriptive Teaching Vocabulary Template

Directions: Add the target Tier 2 or Tier 3 vocabulary word in the center circle. Fill the surrounding circles with AAC core and Tier 1 words or short phrases that can be used to talk about or describe the target word. Use words that:

- are available on the AAC system
- support understanding the target word by describing its function, attributes, or context

Descriptive Teaching Vocabulary Template Example

Example: Say “Today we are talking about pollination. Pollination happens when bees move from flower to flower, taking yellow dust, called pollen, with them. This makes seeds that help the flowers grow. Pollination causes changes to the flower to help it grow.”

Model these words on the AAC system as you speak with your student. Encourage them to use these words as they describe the process with you.
