

Meet LAMP™ and LAMP Words for Life®

LAMP

LAMP stands for Language Acquisition through Motor Planning.

It is a strategy using motor learning principles and a speech-generating device to give nonverbal individuals a way to learn words. See the guiding principles of LAMP below.

1

LAMP Words for Life

It provides robust language for beginning and skilled communicators.

This robust language system combines the power of PRC-Salttillo's Unity language system and the LAMP approach.

2

Features

Every word is produced by one, unique, consistent motor pattern.

Over time, this movement becomes automatic and can be produced quickly. It feels more like typing on a keyboard than searching for pictures.

3
