## Minspeak Systems

Minspeak is a flexible language system that uses multiple meaning symbols in short sequences following simple, easy to learn patterns.

The AAC user has fewer pictures to learn then when using single meaning pictures.

Juice + Verb = Drink

1

Symbol Families

Words are organized into semantic categories. Think of the symbols on the home screen as the head of a family.

All the words related to the head of the family are stored under that symbol.

hungry fruit

bite red

apple eat

2

Benefit

Minspeak systems are efficient. They support communication, language and cognitive development.

Consistent patterns and fixed location of symbols makes it easer for the AAC user to access to 1000's of words using a small set of symbols.
