

## Realize Language Starter's Guide

### Activity Two: Setting Goals

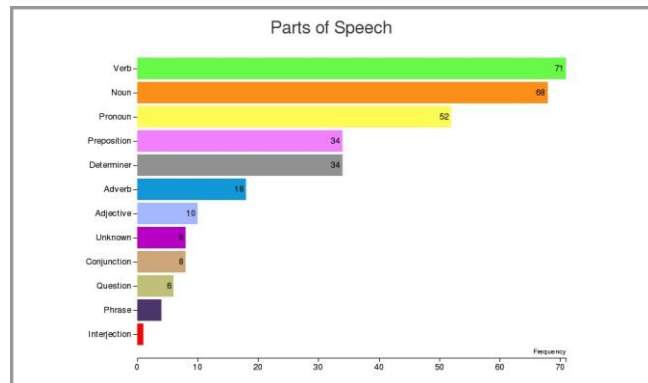

Select the **Analysis** tab.

We will now begin to analyze the information being collated by Realize Language. In the **Word Groups** section your student's words are compared to a "Target Vocabulary." Words that were used are colored to show their word group. The more often they were used the larger they appear.

### Explore

- In the analysis section look at the distribution of different parts of speech.
- Click through the different word groups.

### Questions

What are the 5 words your student uses most?  
Are any of the parts of speech over- or under-represented?

### Try This

- Note 5 words that your student has used at least once, and 5 that he not yet used.
- In the **Manage Goals** section:
  - Create a new list
  - Enter fifteen words as a personal goal for your student
  - Save the list
  - Examine your student's use of these words in the word groups section.
