

TEACHING CORESCANNER WITH MUSIC

Author Information

Dana Arce, M.A., CCC-SLP, ATP, is a Licensed Speech-Language Pathologist specializing in the areas of Augmentative Alternative Communication and Assistive Technology. She is in Northern California and works in both the school and clinic settings to support children and young adults with complex communication and access needs. Dana has presented at both State and National Conventions on topics related to alternative access and auditory scanning. She can be reached at danaarce.slp@gmail.com

Becky Parker, MT-BC, is a graduate of the University of the Pacific where she received her bachelor's degree in Music Therapy and Piano Performance and a minor in French. She completed her music therapy internship at UCSF Benioff Children's Hospital, Oakland, CA. Becky currently works as a NICU music therapist at Sutter Hospital in Sacramento. She has also worked in other settings including special education, pediatric respite care, and adult oncology. Becky lives in the Sierra foothills with her husband, Jared, and son, Abram.

Special Thanks

This has been such a meaningful project to be a part of and develop over the years. These ideas and strategies have helped many students learn to navigate and use their AAC systems. This project initially started as an idea in a student's home as the team tried to come up with some new ways to teach both auditory scanning skills and language. So, a very special thanks that first student, Corinne, her incredible family, and an amazingly dedicated team. Without them, this project would not have been possible. We are so grateful for the opportunity to share this project and watch it continue to grow and help even more AAC users.
