

## Realize Language Starter's Guide

### Activity: Finding Spelled Words

Go to the **Words** page and then select the **List** widget. Now set the toggles to show **Known/Spelled** words.

You will now be able to see all the words that have been spelled out letter by letter. So you may see things like “socks” and “shoes.” But then go ahead and set the toggles to show **Unknown/Spelled** words.

Now you will see instances of where words have been attempted but not spelled correctly e.g. “soks” for “socks” and “shooz” for “shoes.”

When you can see where someone has misspelled a word, the type of mistakes made can help you determine your next steps in teaching spelling.
