

Homework Card

Title: Grammar Wheel

Language Objective: The person will be able to name words according to their category.

Instructions: Use this card to help students name words according to their grammatical category. Take as long as the student needs to learn. You may want to model language multiple times to help them learn it. By modeling language, you are motivating the student to learn.

Steps:

1. Print out the Grammar Wheel. You can laminate it so it will last longer.
Poke a hole in the center of the wheel. Attach the spinner so it moves easily with a brad.
2. Talk about the different grammatical categories and how to find those words on the device. If the person is unsure about a category, give examples of how those words are used. Model and prompt where to find that category of words on their device.
3. Have the person spin the spinner and use their device to name a word in that category.

Target Vocabulary: nouns, verbs, conjunctions, prepositions, question words, determiners
